DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of group 1 in the reply filed on 18 August 2005 is acknowledged. Previously withdrawn claims 1-3 and 15-21 have been canceled.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 4-7 and 9-14 are rejected under 35 U.S.C. 103(a) as obvious over Moore, US006306008B1 in view of Elledge, US 20040089070A1. '008 discloses the claimed invention, including using the information from the sensor(s) to determine the condition of the conditioner. In response to applicant's traversal of the Official notice taken in the

previous Office action, the examiner cites '070, paragraph [0034]. '070 teaches monitoring the surface condition of an end effector used to condition the working surface of a polishing pad, and using the information gathered over the use of the end effector predict the remaining life of the end effector. Therefore it would have been obvious to one of ordinary skill to have provided '008, that discloses the method of monitoring the condition of a conditioner, with the step of using that monitoring to estimate the remaining lifetime, to prevent damage to the workpiece through the use of an improperly processed polishing surface.

Response to Arguments

5. Applicant's arguments filed 11 January 2006 have been fully considered but they are not persuasive. Applicant argues that the Official notice taken by the examiner in the previous Office action is improper. Applicant states "It is certainly not common knowledge capable of instant and unquestionable demonstration that the monitoring pad condition to detect an end of life condition includes predicting remaining life prior to the determination of end of life. Hence, the rejection is improper and the Office action fails to establish a *prima facie* case of obviousness." In response, the examiner now applies '070, as set forth in the rejection above. '070 clearly teaches monitoring a conditioner, and predicting the remaining useful life of that conditioner based on the information gleaned during monitoring.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
